

Features in POS•IM that Quilt & Fabric Shops love!

○ Inventory Management

- MISC fields let you classify your items by departments, categories and sub-categories (ie., Fabric, Thread, Books, Batting, Notions, Patterns, Sewing Machines, Consignment, and Kits)
- Use these MISC fields for item look-up and as a criteria for reports
- Items can be tracked as whole, fractional, or bundle
- Set maximum, minimum and reorder points for POS•IM's auto order feature
- Powerful, yet easy to use import / export feature to update item information

○ Easy to use Point-of-Sale

- Keyboard short cuts are built into POS•IM to make it easy at POS
- Scan barcodes to locate your items quickly and place them on an invoice
- Pop-up screens are provided for quick access to customer information
- At POS you can create, edit, cancel, make payments and finalize a layaway
- Ending Tills report lets you balance each register and prepare bank deposit

○ Create Kits & Fat Quarters

- Use the Kit Builder in POS•IM to streamline creating all kinds of kits!
- Add patterns, thread, buttons, and books to your kit – and POS•IM will calculate the total price
- Cut your fabric into Fat Quarters or Fat Eights and POS•IM will track these as new inventory items

○ Bolt Discrepancies

- POS•IM helps you account for partial yardage remaining at the end of a bolt
- Use a Working Transfer in POS•IM to record shortages and overages
- An Inventory Adjustment Journal sends the accounting data to QuickBooks

○ Classes

- POS•IM's Event Manager allows for tracking classes, attendees, waiting lists, payments, materials, receipts and reports!
- Track registration and print class supply lists easily from your computer

○ Customers

- Add new customers effortlessly in SalesPoint
- Click a button on the customer's card to show detailed sales history
- Track customer's preferences, birthdates, and other important information
- Create Special Orders, Layaways, and track Back Orders with ease!

○ Accounting Link to QuickBooks

- POS•IM creates four summary journals with sales totals, inventory, and purchases – ready for import into QuickBooks
- Errors are minimized, and no duplicate entry is needed!

○ Reports
